Due Date: 2:10 on Thursday, September 16.

Points: This project is out of 5 points.

Instructions: You are to work alone on this project, although you may ask for minor assistance from any of the departmental faculty.

You must turn in your project, typed, at the beginning of class on 9/16. Late projects will not be accepted. You must cite your work properly.

Project Problems:

1. Give a definition of an ordinary differential equation (ODE).
2. Give a definition of linear regression, and determine if the least squares model is a form of linear regression.
