Math 1190 Quiz #7

Problem 1: Find all positive integers that are within 250 of exactly 15 perfect squares. (Note: A perfect square is a number of the form $x^2$ where $x$ is an integer. We say that $a$ is within $n$ of $b$ if $|b - a| \leq n$.)

Problem 2: We call a 10-digit number interesting if its digits are all distinct and it is a multiple of 11111. How many interesting integers are there?
